

Brendan Patrie's Eagle Project

Hello it's Brendan Patrie. My eagle project is coming up on two dates in May and June. I plan on recreating a small trail next to Wapping Community Church that is currently being used as the church's mulch pile. As with all eagle projects I could use as much help as I can get. Here are the two dates and the details of the project that coincide with them:

Sunday, May 2nd: This date is restricted to older scouts and leaders only. On this day, we will be going into the area to remove some invasive vines. The adults will be using chainsaws to take the vines down, while the older scouts will remove the fallen vines from the area.

Saturday, June 12th: This date is open to everyone. On this day we will be doing a multitude of things. One group will be in charge of creating the trail. Some will help create a mulch pile for the church and move the church's grass and leaf waste to this area. Another group will bring the church's wood waste up to a chipper run by adults, and then lay down the chippings on the trail. There will also be a group in charge of creating a small fire ring on the trail. Finally, one group will be placing some logs in the banks of a creek next to the river to prevent erosion.

Both of these dates require as much help as possible, so I hope you all can make it to both if you can! And remember, drinks, pizza, and other assorted foods will be there awaiting the arrival of any and all volunteers. Thanks evryone!
